

Product name: TW7

Bluetooth version: 5.3

Battery input: DC 5V

Earphone Battery: 30mAh

Charge Case Battery: 150mAh

Working time: About 2-3hours

Sensitive: 96+/-3

Frequency: 20Hz-20KHz

Impedance: 32Ω

Profile Support: HFP/HSP/A2DP/AVRCP

- ① Charging case indicator
- ② Charging case
- ③ Charging port
- ④ LED indicator
- ⑤ Press area
- ⑥ Earbud charging contact

Charging Case

When charging: Flash white light

Full power: Solid bright white light

When charging the earbuds: Solid bright white light

Charging time: about 90 minutes

Earbuds

When charging: Solid bright red light

Full power: Light OFF

Charging time: about 60 minutes

Warning

When you are plugging your cable in to a wall charger, we recommend using a UL/ETL 5V/1A approved charger. Don't use the fast charger over 5V/1A to avoid damage to the charging case. To ensure the battery life of the earbuds, the earbuds and charging case should be charged once a month.

Using Both Earbuds / Binaural Use:

1. Remove the earbuds from the charging case, the earbuds will automatically turn on and pair;

2. Turn on the Bluetooth of your mobile phone and put the earbuds close to the mobile phone. Select "Logic TW7" from the Bluetooth device list to connect.

Power OFF:

1.Put the earbuds in to the charging case, the earbuds will turn off automatically. The charging case will automatically charges the earbuds;

2. When the earbuds is turned ON, long touch for 3 seconds to turn it OFF;

3. If the earbuds is not conneted for 5 minutes, it will power OFF automatically.

Charge:

Prepare the USB charger and connect the charging cable to the charger and connect the white light flash after full charging, solid bright white light.

Charge:

Prepare the USB charger and connect the charging cable to the charger and connect the white light flash after full charging, solid bright white light.

Charge:

Prepare the USB charger and connect the charging cable to the charger and connect the white light flash after full charging, solid bright white light.

Charge:

Prepare the USB charger and connect the charging cable to the charger and connect the white light flash after full charging, solid bright white light.

Charge:

Prepare the USB charger and connect the charging cable to the charger and connect the white light flash after full charging, solid bright white light.

Charge:

Prepare the USB charger and connect the charging cable to the charger and connect the white light flash after full charging, solid bright white light.

Charge:

Prepare the USB charger and connect the charging cable to the charger and connect the white light flash after full charging, solid bright white light.

Charge:

Prepare the USB charger and connect the charging cable to the charger and connect the white light flash after full charging, solid bright white light.

Charge:

Prepare the USB charger and connect the charging cable to the charger and connect the white light flash after full charging, solid bright white light.

Charge:

Prepare the USB charger and connect the charging cable to the charger and connect the white light flash after full charging, solid bright white light.

A. When the earbuds can't turned on automatically

Check if the earbuds has power (after the charging case is connected with USB, and the earbuds is put in to the charging case for charging continuously for more than 1 hour).

B. When the earbuds have only one side sound or the mobile phone can not find the Bluetooth device.

1.Make sure that both earbuds are powered on and can be turned on normally;

2. Check if one earbud can connect to the other Bluetooth device;

3. Clear all the corresponding Bluetooth device name on the mobil phone, put both earbuds in to the charging case, find an open area, reconnect the two earbuds.

C. When the earbuds is stuck or disconnected while talking or playing music

1.The earbuds is low on power;

2. Check if the device is within a reasonable distance, preferably within 10 meters;

3. Check if there is a large are of signal barrier between mobile phone and earbuds, such as wall or iron door;

4. There are interfering devices attached, such as routers or Bluetooth devices.

Charge:

Prepare the USB charger and connect the charging cable to the charger and connect the white light flash after full charging, solid bright white light.

Charge:

Prepare the USB charger and connect the charging cable to the charger and connect the white light flash after full charging, solid bright white light.

Charge:

Prepare the USB charger and connect the charging cable to the charger and connect the white light flash after full charging, solid bright white light.

Charge:

Prepare the USB charger and connect the charging cable to the charger and connect the white light flash after full charging, solid bright white light.

Charge:

Prepare the USB charger and connect the charging cable to the charger and connect the white light flash after full charging, solid bright white light.

Charge:

Prepare the USB charger and connect the charging cable to the charger and connect the white light flash after full charging, solid bright white light.

Charge:

Prepare the USB charger and connect the charging cable to the charger and connect the white light flash after full charging, solid bright white light.

Charge:

Prepare the USB charger and connect the charging cable to the charger and connect the white light flash after full charging, solid bright white light.

Charge:

Prepare the USB charger and connect the charging cable to the charger and connect the white light flash after full charging, solid bright white light.

FCC Statement

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

SAR Information Statement

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radiofrequency (RF) energy set by the Federal Communications Commission of the U.S. Government. These limits are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. * Tests for SAR are conducted with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to

a wireless base station antenna, the lower the power output. Before a phone model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model. The highest SAR value for this model phone when tested for use at the ear is 0.396W/kg and when worn on the body, as described in this user guide, is 0.472W/kg(Body-worn measurements differ among phone models, depending upon available accessories and FCC requirements). The maximum scaled SAR in hotspot mode is 0.498W/kg. While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement for safe exposure. The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RFexposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of <http://www.fcc.gov/oet/fccid> after searching on FCC ID: O55680125 Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications Industry Association (CTIA) web-site at <http://www.wow-com.com>. * In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a sub-stancial margin of safety to give additional protection for the public and to account for any variations in measurements.

Body-worn Operation

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 10mm must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.

Especificaciones del Producto >>

Nombre del Producto: TW7
Version de Bluetooth: 5.3
Entrada de Batería: DC 5V
Batería de los Auriculares: 30mAh
Batería del Estuche de Carga: 150mAh
Tiempo de Funcionamiento: Aprox. 2-3horas
Sensibilidad: 96+/-3
Frecuencia: 20Hz-20KHz
Impedancia: 32Ω
Compatibilidad con Perfiles: HFP/HSP/A2DP/AVRCP

Intrucciones de Operación >>

Función Binaural :

L R : Haga clic 1 vez | Reproducir/Pausar | Recibir una llamada/Finalizar la llamada
L R : Mantenga pulsado durante 2 segundos | Rechazo de llamadas
L R : Pulsación larga durante 2 segundos | Encender
L R : Pulsación larga durante 3 segundos | Apagado
L : Haga clic 3 veces | Volver a marcar el último número
R : Haga clic 3 veces | Activar asistente de voz
L : Pulsación larga 2 segundos | Canción anterior
R : Pulsación larga de 2 segundos | Siguiente canción
L : Haga clic 2 veces | Vol+
R : Haga clic 2 veces | Vol -

Esquema del Producto >>

Estuche de Carga
Durante la carga: Luz blanca intermitente
Carga completa: Luz blanca brillante fija
Durante la carga de los auriculares: Luz blanca brillante fija
Tiempo de carga: aprox. 90 minutos
Auriculares
Durante la carga: Luz roja brillante fija
Carga Completa: Luz apagada
Tiempo de carga: aprox. 60 minutos
Advertencia
Cuando conecte el cable a un cargador de pared, le recomendamos utilizar un cargador aprobado por UL/ETL de 5 V/1 A. No utilice el cargador rápido a más de 5 V/1 A para evitar dañar el estuche de carga. Para garantizar la vida útil de la batería de los auriculares, estos y el estuche de carga deben cargarse una vez al mes.

Carga:

Prepare el cargador USB y conecte el cable de carga al cargador y conecte la luz blanca parpadeará después de la carga completa, una luz blanca sólida y brillante.

Operación del Producto >>

Uso de ambos Auriculares/Uso Binaural :
1. Retire los auriculares del estuche de carga; se encenderán automáticamente y se emparejarán;
2. Encienda el Bluetooth de su teléfono móvil y coloque los auriculares cerca del teléfono móvil. Seleccione "Logic TW7" de la lista de dispositivos Bluetooth para conectarlos.

Apagado:
1. Coloque los auriculares en el estuche de carga; se apagarán automáticamente.
El estuche de carga cargará automáticamente los auriculares.
2. Cuando los auriculares estén encendidos, manténgalos presionados durante 3 segundos para apagarlos.
3. Si los auriculares no están conectados durante 5 minutos, se apagarán automáticamente.

C. Cuando los auriculares se atascan o se desconectan mientras habla o reproduce música

1. Los auriculares tienen poca carga;
2. Verifique si el dispositivo está a una distancia razonable, preferiblemente a 10 metros;
3. Compruebe si hay una gran barrera de señal entre el teléfono móvil y los auriculares, como una pared o una puerta de hierro;
4. Hay dispositivos que interfieren conectados, como enrutadores o dispositivos Bluetooth.

FCC Statement

LOGIC

Warranty Certificate Terms and Conditions

LOGIC warrants that their Products will be free from defects in material and workmanship. The warranty period is one (1) year for the products and three (3) months for the accessories which are part of the original package including the battery. The warranty period begins the date of purchase by the End-User who shall present an invoice or a purchase receipt when requiring warranty service otherwise the warranty period will begin from the date of manufacture of the product. LOGIC will repair a product without cost to the customer if it presents a manufacturing defect or defect in workmanship during the warranty period and if the defect occurred under normal conditions of use in accordance with the instructions and specifications stated in the user's manual.

For additional information about the terms and conditions of LOGIC's Limited Warranty or to obtain warranty service information, please visit the support section at: logicmobility.com

Certificado de Garantía Términos y Condiciones

LOGIC garantiza que sus productos estarán libres de defectos de materia prima y ensamblaje. El periodo de garantía es de un (1) año para los productos y de tres (3) meses para los accesorios que forman parte del paquete original incluyendo la batería. El usuario final deberá presentar una factura o un recibo de compra cuando exija el servicio de garantía, de lo contrario el periodo de garantía comenzará a partir de la fecha de fabricación del producto. LOGIC reparará un producto, sin costo para el cliente si presenta un defecto de fabricación o un defecto de ensamblaje durante el periodo de garantía y si el defecto se produjo en condiciones normales de uso de acuerdo con las instrucciones y especificaciones indicadas en el manual del usuario.

Para más detalles de la Garantía Limitada de LOGIC y para obtener información del servicio de garantía, por favor visite la sección de soporte en nuestro sitio web: logicmobility.com.
